

Please take this letter to your local doctor or medical centre

Dear Doctor,

Thank you for seeing the recipient of this letter for a standard asymptomatic sexual health check-up. They completed our online self-assessment tool and we suggested they attend their local doctor for this service.

The Australian STI Management Guidelines (<http://www.sti.guidelines.org.au/>) recommend the following tests for people who are asymptomatic:

Chlamydia: first pass urine or self-collected vaginal swab

Gonorrhoea: first pass urine or self-collected vaginal swab

Syphilis: Blood test

Hepatitis B: Blood test

HIV: Blood test

If you require further information, please contact the Sexual Health Infolink at 1800 451 624.

Sincerely,

Sydney Sexual Health Centre
